

Connecting with SharePoint

Ensim Connect is an intuitive end user productivity dashboard based on SharePoint technology that lets users create, edit, track and manage SharePoint sites, members and resources from an easy to use web based or mobile device based portal.

Ensim Connect is fully integrated with chat and calendaring platforms and is designed for organizations that use SharePoint but require a more intuitive user interface that can incorporate business processes designed to simplify and enhance the standard SharePoint interface. Ensim Connect delivers the business process orientation for SharePoint that many feel is critical to the successful introduction and use of collaboration technology.

Ensim Connect simplifies and enhances SharePoint for end users.

Collaborate Easily and Effectively

Helps teams stay connected and productive by providing easy access to people, documents, and information needed to make more informed decisions

Easily manage documents and help ensure integrity of content

Author and manage documents more effectively. Ensim Connect ensures document integrity with enhanced features including the option to require document check-out before editing, the ability to view past revisions and restore to

Top Benefits & Features

- Easy Collaboration
- Manage Documents
- Project Management Tools
- Improved Team Communication
- Integration with Applications
- Accessibility Anywhere and and at Anytime
- Integrates with Live Meeting

Easy to use Project Management Tools

Help people and teams stay on task with a variety of communication features that let users know when actions are required. Ensim Connect also notifies users when important changes are made to existing information or documentation, including announcements, sophisticated alerts, surveys, discussion boards, and RSS.

Improve Team Communication

Ensim Connect leverages Microsoft SharePoint 2010 Foundation helping teams with creative forums for brainstorming ideas, building knowledge bases, or simply gathering information with easy-to-edit and wikis.

Integration with Familiar Applications

Integration with other desktop applications such as the Microsoft Office makes it easy for users to get up to speed quickly. For example, users can create workspaces, post and edit documents, and view and update calendars on Ensim Connect Microsoft SharePoint 2010 Foundation sites, all while working within Microsoft Office system files and programs.

Accessible anywhere, anytime

Users can stay productive while mobile with enhanced support for offline synchronization through Microsoft Office Outlook 2007, which enables users to manage document libraries, lists, calendars, contacts, tasks, and discussions when offline, and to synchronize changes when reconnected to the network.

Integration features with Live Meeting, Audio and Video Conferencing

By adding Ensim Connect Team Conferencing to your list of applications, you can use Microsoft SharePoint 2010 Foundation to collaborate in a convenient, real time, online environment.
