

## Easily & Quickly Deploy OCS

Ensim Unify's OCS 2007 Manager is an essential companion for any Microsoft Office Communication Server (OCS) deployment. Customers report cutting deployment and management time by over 70% - this includes complex IT policy requirements for user entitlements - across the full range of OCS features.

Ensim Unify Enterprise Edition is a complete, role-based provisioning solution that can be deployed just for OCS or across the entire unified communications infrastructure.

## Integration with Existing Provisioning Policies

Ensim Unify provides a provisioning overlay that integrates quickly with existing ID management solutions, HR portals, Intranet, and ERP solutions. Ensim's OCS Manager uses role-based, delegated administration to ensure IT Policy and Security requirements are met - from system administrators defining resource pools all the way down to end user, self-service management of group chat lists.

## Multiple Provisioning Workflows

Ensim's OCS Manager provides full support for different types of employees with different access requirements, SLA's or different regional requirements that are considered critical in regulated environments.

## Maintenance Task Automation

For large organizations, Ensim's OCS Manager allows the hundreds of daily manual updates to employee status to be automated and performed off-hours if necessary.

## Multi-level Help Desk Support

Ensim Unify allows flexibility without the need to worry about access to native interfaces, multi-level Help Desk support is built-in.

## Full Audit and Reporting

Any change made at any time in the provisioning or modification process is captured for audit reporting. Ensim Unify works with existing policy and entitlement management systems to provision and manage access to the full range of OCS features while adhering to IT compliance and security policies.

**You can't deploy OCS unless you can provision it.**

### OCS Manager

- Eliminates time consuming (and error prone) manual user provisioning
- Plugs security holes created by incorrectly provisioned user accounts
- Addresses concerns of Help Desk access to native OCS interface
- Works with existing policy engines and entitlement management systems

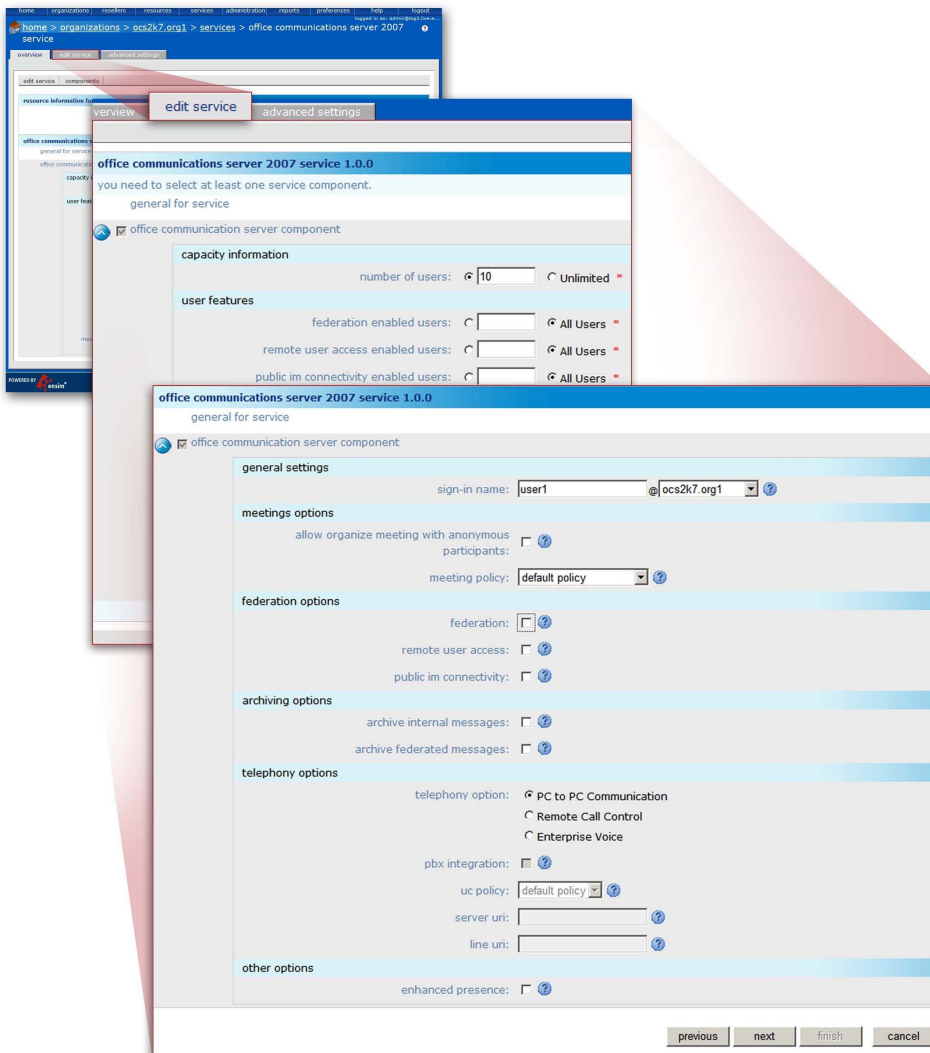

## Key Features

- Role-based Delegated Administration and Provisioning
- Support for Bulk updates
- Customizable and extensible provisioning workflow
- Robust Web Services API
- Complete Resource Management and Transaction Logs

## Key Benefits

- Quickly deploy, provision, and manage OCS accounts
- Automate enforcement of IT Security and Compliance Policy
- Provides Integration with existing identity management solutions
- Secure OCS infrastructure
- Simplify Compliance and Security Audits

## Who should use Ensim OCS Manager?

- Organizations with a plan to deploy OCS in the next 6 months
- Organizations who need to automate the enforcement of IT and security policies
- Organizations that want the features of OCS without the provisioning and management headaches
- Organizations with more than 5,000 employees
