

The Leading Service Delivery Platform for Unified Communications

Ensim Unify Service Provider Edition is the industry's most widely deployed and proven service delivery platform for Microsoft Messaging, Collaboration and many other hosted services. It enables service providers to centrally create, control and deliver hosted applications based on a highly modular, scalable and extensible architecture.

Ensim Unify combines powerful, web-based control panel technology for service providers, resellers and customers with the advanced technology to seamlessly manage multi-tenant or multiple dedicated environments in a single platform.

Ensim Unify Service Provider offers:

- Provisioning Automation
- Role-based Delegated Administration and Access
- Advanced Reseller Capabilities
- Monitoring and Metering of Services
- Billing and Reporting
- Extensibility through Easy Integration of Third Party Applications
- Pre-built control panel for Microsoft applications, BroadSoft, Fenestrae, Hyper-V, BlackBerry and more...

Deliver the following hosted services today!

- Messaging & Collaboration
- Web Hosting
- Mobility Solutions
- Productivity Solutions

“Our joint development on Ensim’s Unify solution offers service providers the infrastructure they need to profitably deliver the exciting new generation of hosted services to consumers and small business markets.”

Pascal Martin,
General Manager,
Communications & Mobility
Solutions - Microsoft

Solve the Business and Operational Challenges of Delivering and Managing Hosted IP Services

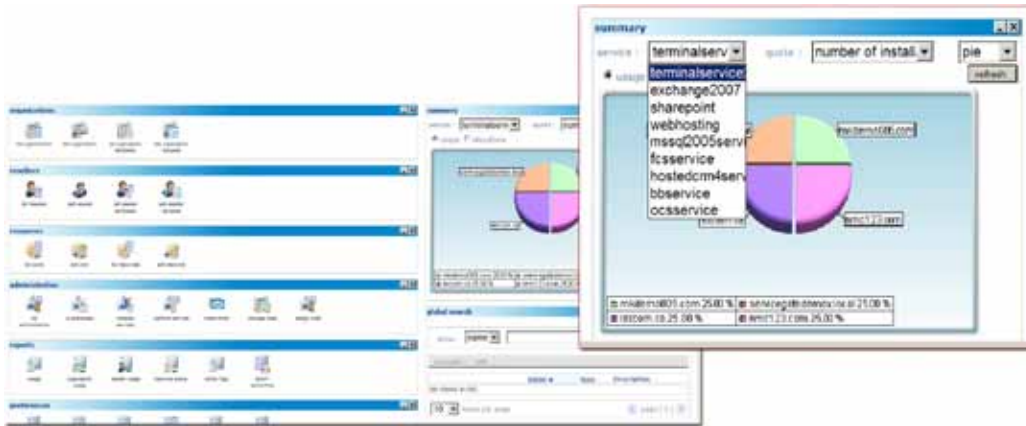

While the demand for SaaS is clear, service providers continue to struggle with the economics of delivering and maintaining such services. To succeed you must be quick to market with an automated solution that provides flexible centralized management. Ensim Unify acts as the proxy between hosters and the applications they offer as hosted services, removing barriers and leaving you free to focus on what matters most: scaling your business for success.

Lowest Service Delivery Costs

Delegated administration empowers customers and partners through comprehensive self-management web portals, resulting in increased satisfaction, low churn and decreased cost of support.

Extensibility

Easily and quickly integrate any application into Ensim Unify and turn it into a hosted service. Wholesale capabilities efficiently support all sizes and types of distribution channels and business models including global telecommunications companies and their resellers.

Industry Leading Technology

Ensim Unify is more than a control panel. We offer a comprehensive service delivery platform that scales with your needs. Join leading companies such as KDDI, NTT, Telus, NaviSite, Outsourcery and many more.

Advanced Control Panel

- Delegated Administration
- Role-based Interface
- Resource Management
- Provisioning Automation
