

Exchange Manager

Ensim Unify Exchange Manager is a crucial component of your IT infrastructure that combines user provisioning with role-based, delegated administration and cost saving end-user self-service to form a complete management solution for Microsoft Exchange. Ensim Unify saves on administrative overhead while it protects and insulates your Exchange environment from downtime. Exchange Manager is part of Ensim Unify Enterprise Edition, an award-winning suite of integrated tools designed to manage your Microsoft infrastructure.

Avoid the most common causes of Exchange downtime - mis-configuration. No one wants an Exchange disaster – especially the kind that is easily avoided with the right management tools and IT policies. Exchange Manager allows senior IT administrators to set policies that work hand-in-hand with Active Directory to protect your Exchange environment and your uptime guarantees.

Capabilities Include

- Granular role-based delegated administration
- Automated provisioning / de-provisioning policies
- Management of distribution groups
- Information or ethical walling capability

“Misconfiguration of Exchange is one of the major causes of Exchange downtime”

Matt Cain,
Research VP,
Gartner Research

With Ensim Unify Exchange Manager Installed

Role-based Delegation

Use role-based delegation to eliminate the possibility of mis-configured user accounts.

IT Policy

Stop spending time worrying about security and audits. Policies established with Unify are auditable against your compliance initiatives.

System Automation

Standardize your IT operations including provisioning. Eliminate time consuming manual processes and script updates.

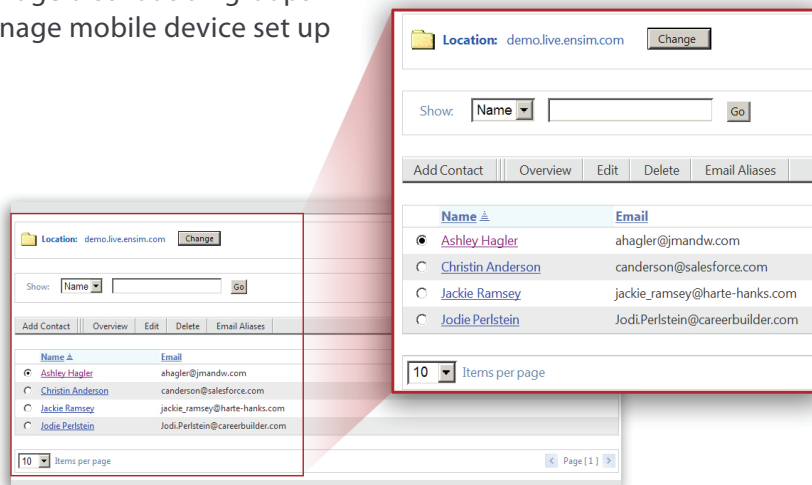

Group Management

No review process is required to ensure users are provisioned into the right distribution and security groups.

End-user Productivity

In addition to the capabilities provided to IT administrators, end user self-service becomes a reality through Ensim Unify Exchange Manager web based portal. When an end-user is provisioned by an IT administrator through Exchange Manager they are equipped with an easy to user interface, which allows them to:

- Manage contacts
- Manage mail box delegation
- Manage distribution groups
- Manage mobile device set up

The benefit to employees is increased productivity and the flexibility to help themselves, lowering IT costs and overhead. For IT administrators help desk calls are reduced, freeing up the IT team to focus on more critical initiatives.
